

The perfect solution for providing convenience and ease of use to adult customers while maintaining a sensible approach to protecting youth.

Social Responsibility

Now more than ever it is important for us to adhere to our social responsibility

to protect our youth and vulnerable people.

We are introducing the Child Safety Bag Program, taking an extra step to ensure public safety and to assist in the prevention of unauthorized access. C|A|F|E strives to ensure the wellbeing of everyone. C|A|F|E Child Resistant Bags are an eco-friendly packaging solution for medical marijuana and edibles.

Introducing

The Child Safety Bag Program

Safety, Assurance, Wellbeing

Child resistant exit bags are the perfect solution for providing convenience and ease of use to adult customers while maintaining a sensible approach to protecting youth.

This child resistant packaging for cannabis is made from unique thick-but-flexible layers of opaque, food-grade plastic that are “smell proof” and protect against the entry of outside elements like air, moisture, odor, and bacteria that can compromise the quality of the product inside.

The Child Safety Bag fee will be a \$2.00 refundable purchase on top of your order. Simply reuse your bag for future purchases and help us to promote a safe, sensible approach to maintaining our mutual social responsibility around the privilege of the consumption of cannabis.

The bags feature a scientifically developed child-resistant lock at the top with comprehensive instructions to open – users must push the small lever up, then pull the zipper out to access the items. To reclose, consumers push the zipper lock until they hear a “click” from the bottom lever. These extra steps are easy for adults to follow but make it difficult for children to access what’s inside.
